

Sports Goggle Form

The standard (2mm thickness) and industrial thickness (3mm thickness) CR39 lenses are in compliance with the FDA 21 CFR 801.410. The industrial thickness lenses are more impact resistant than the standard impact resistant lenses. Neither lens is shatterproof or unbreakable.

The undersigned client hereby certifies that s/he has been informed and agrees that the sports goggle is being modified by the providing of industrial thickness impact resistant plastic lenses. I am aware that these lenses are not the higher impact resistant Polycarbonate or Trivex lenses.
